

Vedant Chandra

Updated June 17, 2020.

Employment

- June, 2020 - **Research Intern**, *Space Telescope Science Institute*.
Present Modeling nearby resolved galaxies with the Hubble Space Telescope.
Supervised by Dr Mario Gennaro
- June, 2020 - **Summer Fellow**, *Institute for Data Intensive Engineering and Science*.
Present Hunting for the oldest and most metal-poor stars in the Universe.
Supervised by Professor Kevin Schlaufman
- November, 2018 - **Research Assistant**, *Department of Physics & Astronomy, Johns Hopkins University*.
Present Characterizing white dwarf stars with atmospheric models and spectroscopic data.
Supervised by Professor Nadia Zakamska

Education

- 2017-Present **B.S. in Physics and Applied Mathematics**, *Johns Hopkins University*, Baltimore, MD, USA, (Minor in Space Sciences).
Advised by Professors Tobias Marriage, Beryl Castello, and Charles L. Bennett.

Awards and Honors

- 2020 **Sigma Pi Sigma**, *JHU Department of Physics*.
Elected to the national Physics honors society for strong academic achievement.
- 2020 **Summer Student Fellowship**, *Institute for Data Intensive Engineering & Science*.
Awarded a \$6000 grant for ongoing data-intensive research into metal-poor stars.
- 2019 **Provost's Undergraduate Research Award (PURA)**, *JHU HOUR*.
Awarded a \$3000 grant for ongoing research into white dwarf atmospheres.
- 2019 **Dean's Undergraduate Research Award (now ASPIRE)**, *JHU URSCA*.
Awarded a \$4500 grant for ongoing research into white dwarf binaries.
- 2017-2020 **Dean's List**, *JHU Krieger School of Arts and Sciences*.
GPA above 3.5/4.0 for 6/6 semesters.

Invited Talks

- August, 2019 **Space Telescope Science Institute**, *Summer Symposium*.
"White Dwarf Spectroscopy with Machine Learning" (15 min.)
- July, 2019 **Maryland Space Grant Consortium**, *Annual Symposium*.
"White Dwarf Astronomy with Machine Learning" (15 min.)

Research Presentations

- January, 2020 **NASA**, *Human Research Program Investigators Workshop*.
"Multivariate Analysis of Human Health and Performance in Spaceflight Simulation"
- October, 2019 **Institute for Data Intensive Engineering & Science**, *Annual Symposium*.
"Characterizing White Dwarf Spectra with Neural Networks"

April, 2019 **Johns Hopkins University**, *DREAMS Conference*.
"Hunting for Binary White Dwarf Stars with Spectroscopic Analysis"

Grant Allocations as Co-I

April, 2020 **Space Telescope Science Institute**, *JWST Discretionary Fund (\$42,740)*.
"The Initial Mass Function of Resolved Stellar Populations in the Local Group"
PI: Mario Gennaro, Co-I: Vedant Chandra

Observatory Allocations as Co-I

2020 **Gemini Observatory**, *GMOS Spectrograph*.
"Discovery of mass-dependent gravitational redshifts in white dwarfs"
PI: Hsiang-Chih Hwang

2019-2020 **Apache Point Observatory**, *DIS Spectrograph*.
"Gravitational redshifts of white dwarfs"
PI: Hsiang-Chih Hwang

Skills

- **Programming Environments:** Python, Jupyter, MATLAB, UNIX, CUDA, LaTeX, high-performance cluster computing.
- **Research Experience:** Stellar spectroscopy, signal processing, non-linear dynamics, (un)supervised machine learning, artificial neural networks, statistical modeling, Bayesian statistics and simulations (MCMC, SMC & ABC).
- **Supercomputer Allocations:** Blue Crab cluster at the Maryland Advanced Research Computing Center.

Teaching Experience

Fall, 2018 **TA**, *Great Books at Hopkins*, JHU Literature & Philosophy.

Summer, 2018 **TA**, *General Physics I*, JHU Physics & Astronomy.

Outreach

2018-2019 **Head of Logistics**, *JHU MedHacks Hackathon*.

2018-2019 **Volunteer**, *JHU Physics Department Spring Fair*.
